

Lukas Design

Profilo Smart by Lukas Design is a furnishing system in three parts: a track installed on the wall, a covering for the track, and a series of support systems that can be adjusted horizontally and vertically. Furnishings, functional accessories and design articles can all be arranged on the track in a few minutes and without the need of tools or specialised personnel. The system would be particularly useful for hotels, as it allows multiple rooms to be arranged or refitted quickly and to the same standard. www.profilosmart.com

Junckers

Junckers' sports floors have been specified for the prestigious Sport Wales National Centre. Registered as an official Olympic training camp for the 2012 games, the centre has to accommodate a variety of international-level sports. Sport Wales chose a high performance, fully sprung SylvaSport floor from Junckers, laid on New Era battens. Considered "builder-friendly" and economical, Junckers' flooring systems have been used in similar facilities all over the world. www.junckers.co.uk

Jungeun Han

Sliding bench by Jungeun Han is designed for open spaces where some people may wish to sit alone but others want to sit with friends or family. With one simple movement, each seat can move to the side, either joining or separating its users. Sliding bench is made from American white oak. www.jungeunhan.co.uk

International Decorative Surfaces

Solid surface material Hanex, which is available exclusively through International Decorative Surfaces, is launching 20 new effects to expand its range to 100 colours. Hanex is a 100 percent acrylic product that can be cut, moulded or thermoformed into 3D shapes for use in domestic, commercial, leisure, transport and public sector projects. Each design in the range can be polished to a high gloss or kept as matt. www.hanex.co.uk

Milliken Contract

Shadowbox is the latest modular carpet from Milliken Contract. It is designed to complement the Scattergraph range from the Out of the Shadows collection. Shadowbox takes its cues from nature, with striated colour combinations influenced by stormy skies and light breaking through clouds. Available in 14 shades, the carbon-neutral Shadowbox is made from high-performance nylon type 6 for ease of maintenance and wear resistance. www.millikencontract.co.uk
